(54) Title: A CD OR DVD WITH A PRINTABLE LAYER AND REMOVABLE BORDERS

(57) Abstract: A CD or DVD has a blank printable layer (11) on its upper surface, the printable layer having an inner periphery (12), an outer periphery (14), a removable inner border (13) adjacent the inner periphery (12) and a removable outer border (15) adjacent the outer periphery (14). In use, the desired material is printed onto the printable layer (11) within the confines of the inner and outer borders (13 & 15) with the usual result that some of the material is unintentionally printed off-centre onto the inner and outer borders (13 and 15). The borders (13 and 15) can then be removed so that the remaining printed material appears as a symmetrical printed label. If, however, the material is printed symmetrically, the borders (13 and 15) do not need to be removed.
